Since 2009, MTPSAN has worked with qualified personnel with more than 20 years of experience in production and management systems for the automotive industry to produce high quality plastic moulding. Employing a low cost production model we offer injection moulding at highly competitive prices which improves productivity during production time, additionally we also offer Tooling design, manufacture and maintenance.

We offer quality assured, client oriented injection moulding with the following characteristics:

- Newbury, Arburg and HJ injection machines
- ► Clamping capacity of 75, 125 and 120/140 tons respectively
- ► Injection capacity up to 200g per shot
- ► Availability of 2 shifts
- ► APQP and PPAP compliant quality assurance systems

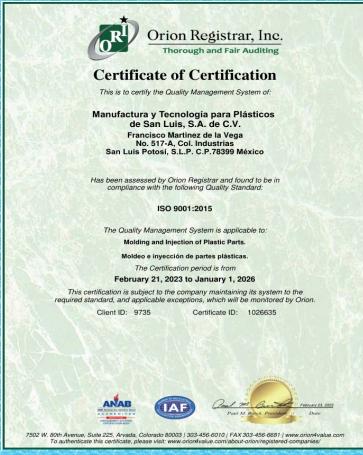

We are ISO 9001 certified since 2017 and have received awards for our excellence in quality production and assurance from our clients which include:

- Bosch (automotive)
- Daikin (home appliances and hydraulics)
- Contitech (automotive)

We offer injection of an ample spectrum of part types of diverse complexity such as plastic grommets for MS and M10 starters, plastic caps for automotive sensors (Bosch), anti-vibration mountings and knobs (Daikin). Employing an ample variety of thermoplastic resins such as: TPV, PA, PBT, ABS, PP and PE. Likewise we also count with in-house tooling designing and manufacturing.
